## STOP CHILD ABUSE AND NEGLECT

Child neglect and abuse can be termed as a form of abuse where the parent, or anyone who is responsible for taking care of the child, fails to meet the basic needs of the child.

- Neglect can be in different forms like physical, educational, emotional, sexual, and medical.
- The problems one faces due to child neglect and abuse are not just temporary but it has a lifetime effect on an individual.
- Without one trying to heal on an individual level or without any support, things can get worse leading to a poorer quality of life, emotionally, physically, psychologically, socially, and financially.

We can avoid this through proper parental knowledge and societal effort, it may be possible to reduce the risk for the above-mentioned issues in society. We can definitely put an end to this issue by working together to spread awareness and prevent child abuse and neglect!
